

# SeeSaw Instructions

1. On the SeeSaw Class App or Website this is the first screen you should see:

2. Students should click the second option “I’m a Student”.

3. Then the screen will look like this (a class list of names):

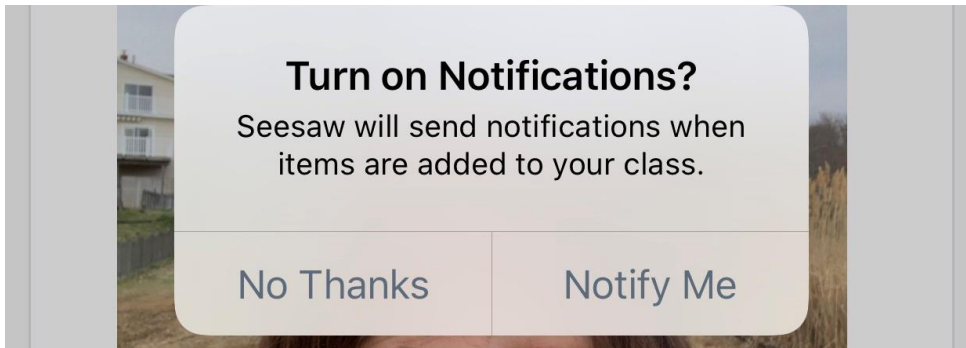

4. Scroll through and click your name.

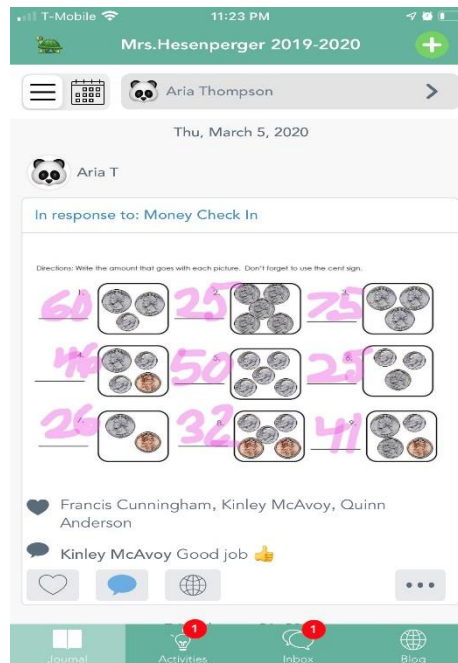

5. Once you click your name a screen will pop up like this with your name on it. Please click the green checkmark to confirm this is you. The green checkmark will become a normal confirmation button in this platform.

6. If you HAVE NOT signed onto SeeSaw on the device a message like this will pop up next. I would click “Notify Me” so you see when your teacher has added things.

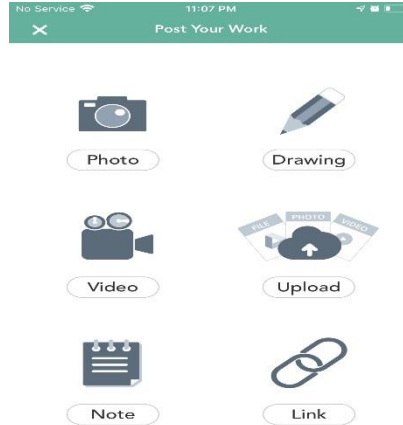

If you HAVE signed onto SeeSaw on this device before you should see a dashboard like this with your work scrolling through and the buttons on the bottom of the screen. If any buttons have a red bubble on them this means you have notifications that you should read click on before you begin. As you see below the “Activities” and “Inbox” have red bubbles with the number 1 in them which means they have 1 thing to read in each.

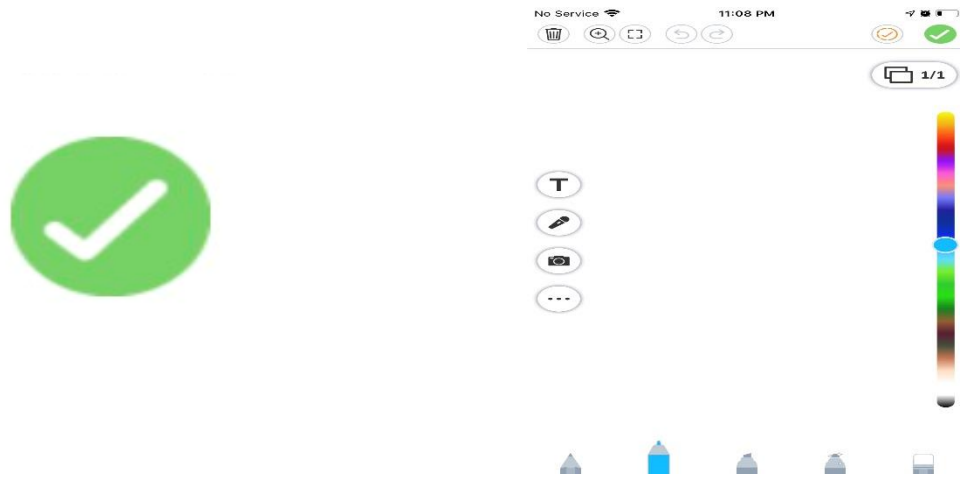

7. To add something to your account like take a picture of your work click the green plus sign that looks like this at the top of the screen:

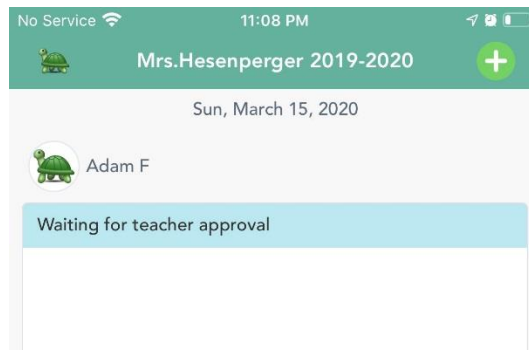

8. When you click on this the next window will look like this and you can decide what you would like to post:

9. After you click on a photo, drawing, video or notes (because those are most likely the things students will use) you will look for the green check mark that looks like this at the top of the screen. You will need to hit that button at least once to post it. Also, remember to start over the x or trash can on the opposite side of the screen will let you delete and start over. It may be fun to play around like that when getting used to all the new tools and updates on SeeSaw.

10. Once you have posted your work you will see a blue screen that stays "Waiting for Teacher Approval" as you see below and will not show up until your teacher has seen your work.

11. To look for an assigned activity look for the “Activity” button that looks like a light bulb as you see below. And click on it.

12. Then scroll through and find the activity title you are looking for. Read or listen to the instructions then click the add button to do the activity. When you are done you will click the green check mark as you did before and wait for teacher approval.
